DETAILED ACTION

Claims 1-6 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, Claims 1-5, drawn to the polypeptide of SEQ ID NO: 2, the encoding polynucleotide, and a method of using the polypeptide to identify modulators.

Group II, Claim 6, drawn to a method of treatment using modulators of the polypeptide of SEQ ID NO: 2.

The inventions listed as Group I relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they comprise the same or corresponding special technical feature, the polypeptide of SEQ ID NO: 2, the encoding polynucleotide, and a method of identifying modulators of the polypeptide. The method of Group II are not so linked to Group I as to be encompassed by said single general inventive concept because said methods do not share the same modes of operation, functions, or effects of the methods of Group I.

A search for more than one of Inventions I-II would be a burden on the Office because the methods of Inventions I-II comprise different steps, utilize different products, and/or produce different results. Thus, a search for one said invention would not encompass a search for any other invention and searching all of Inventions I-II would be a burden on the Office.

Art Unit: 1656

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
